Customizing Language Strings with the Polaris Web Admin Tool

The Polaris Web Admin Tool is a web-based tool you can use to customize English and other licensed language strings in many parts of Polaris, including the following:

- Polaris PowerPAC, including Community Profiles information displayed in PAC
- Polaris ExpressCheck
- Polaris MobilePAC
- Notices (print, email, and text message)
- Outbound telephony (telephone notices)
- Inbound telephony (Polaris Phone Attendant)
- PAC search results labels (ERMSPortal)
- PAC interlibrary loan (ILL) messages
- eReceipts
- Polaris Fusion
- ContentXChange
- Staff Web client (Leap)
- Staff client (missing part messages)

You can compare, add, edit, and distribute language strings easily, without editing individual files.

You can add or customize language strings at the system, library, and branch levels. Branch settings override library settings; settings made at the library level override system-level settings.

The Web Admin Tool also provides tools specifically for PAC applications, including a language string identifier for PowerPAC and a Reload tool to clear page caches and reload Polaris PowerPAC, Polaris PowerPAC Children's Edition, and MobilePAC pages.

> **Note:** The Polaris Web Admin Tool also provides a tab for PAPI Key Management, where you can enter and edit access keys for the Polaris

API. For more information, see the "*Polaris Application Programming Interface (PAPI) Reference*".

Requirements

The Polaris Web Admin Tool is automatically installed when you install Polaris Web Server software. In Polaris Administration, the server record must have a web connection defined, and a value defined for the PAC parameter **URL of the Mobile PAC's root** or **URL of the PowerPAC's root**.
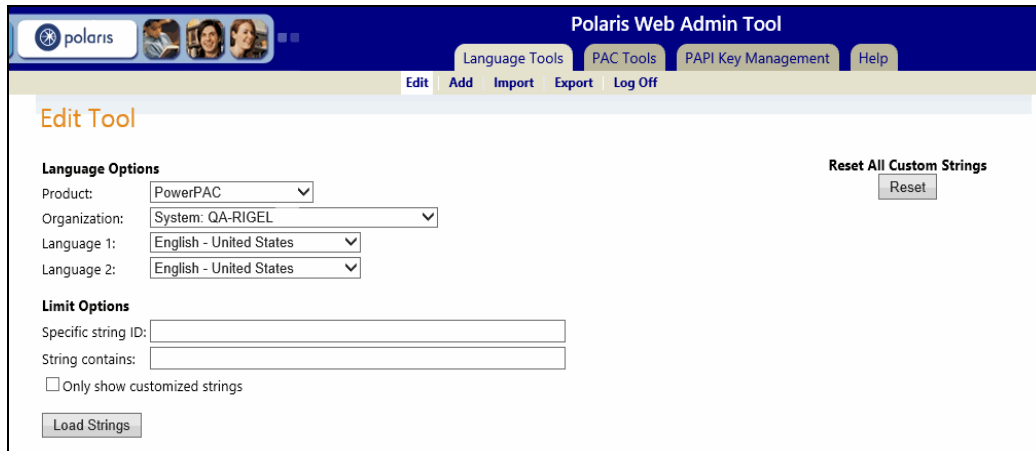

The server must be registered as a workstation in Polaris Administration, and both the workstation and staff user must have the permission **WebAdmin access: Allow**. In Polaris Administration, this permission is available at the system level under the System Administration security node. For more information about registering workstations and setting Polaris permissions, see Polaris staff client online Help.

You must supply your Polaris username, password, and domain to log in to the Web Admin Tool.

Comparing and Editing Language Strings

To compare and edit language strings for any product

1. Open your web browser and navigate to the Web Admin Tool site on your server. The Log On page opens.

2. Type your username and password, and click **OK**. The Language Editor opens and the Edit page appears.

3. In the **Product** box, select the Polaris product:
   - PowerPAC
   - ExpressCheck
   - Inbound Telephony
   - Outbound Telephony
   - Notices
   - ILL (interlibrary loan and request messages that appear in PAC)
   - Polaris Fusion
   - MobilePAC
   - ERMSPortal (contains labels for elements in PowerPAC, MobilePAC, and Community Information search results)

- Receipts (email and text message receipt content)
- ContentXChange
- Staff Web Client (Leap)
- Staff Client (missing part messages)

> **Note:** If a product is not licensed, no additional options are available.

4. Select the organization for which you are making the modification. You can edit language strings at the system, library, or branch level.

5. Select languages to compare and edit.

   Only licensed languages are available for selection. Select two languages (for example, English and Spanish) to compare the equivalent strings side-by-side. If you want to edit only one language (for example, English), set both languages to English.

6. (Optional) To limit the language strings that appear, select one of the following options:

   - **Specific string ID** - Each language string is identified by a unique identification code (string ID). If you want to display a specific language string and you know the code, enter it here. See also:

     ◦ String IDs for PowerPAC - [Identifying Polaris PowerPAC Language Strings by ID](#)

       > **Note:** Certain PAC messages related to hold requests are not automatically listed. To list these messages, select the ILL "product" and type a portion of the message text in the String contains box. To edit labels for elements in PAC brief and full search results, select the ERMSPortal "product."

     ◦ String IDs for notices and related reports - [Polaris Notice Strings Reference](#)
     ◦ String IDs for outbound telephony - [Outbound Telephony Strings Reference](#)
     ◦ String IDs for inbound telephony - [Inbound Telephony Strings Reference](#)
     ◦ String IDs for eReceipts - [Polaris Receipt Strings Reference](#)

- String IDs for eReceipts - [Polaris Receipt Strings Reference](#)
- String IDs for Community Profiles displayed in PowerPAC - [Identifying Polaris PowerPAC Language Strings by ID](#)
- String IDs for ContentXChange content displayed on community organization web site - [Polaris ContentXChange Strings Reference](#)
- String IDs for Polaris Fusion - [Polaris Fusion Strings Reference](#)
- String IDs for Staff Web Client (Leap) - [Staff Web Client (Leap) Strings](#)

- **String contains** - You can display language strings that contain specific text. Enter the text here.
- **Only show customized language strings** - Check this box to limit the list to strings that have already been customized.

7. Click **Load Strings**. The strings appear in a table with the first language on the left and the equivalent string in the second language on the right. The string ID appears above each string for both languages.

8. Click to edit a string. (If you are editing two languages, you edit each language separately.) The custom box for the string appears.
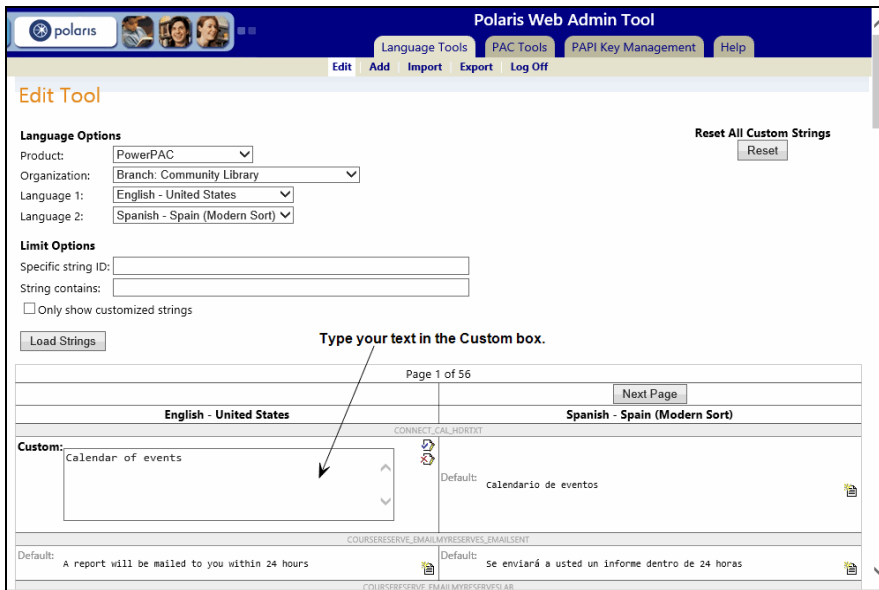

9. Type your custom text in the **Custom** box, and click to save your changes. (You can click to restore the default value.)

> **Important:** Variables supplied by the system from the database, such as specific dates, titles, and authors, are represented by a percent sign and a character in the language string. For example, %s. Do not edit these characters.

After you save your custom text, the string is labeled **Custom:** and the custom text appears in a different color.

You can click to open the custom box again, or click to restore the default value.

> **Note:** To restore all custom strings to their default values, click **Reset All Custom Strings** at the top of the page. If the system organization is selected in the **Organization** box, you will remove all inherited customizations for libraries and branches. If a library or branch organization is selected, only the customizations made at that level are reset.

10. If you have been working with PowerPAC strings, reload the page cache. See [Reload a PAC Application](#).

Adding Language Strings

You can add your own language strings to a product instead of replacing default strings. When you add a string, it is added to all licensed languages for the selected product at the system level. You can edit each organization and each language as needed.

> **Note:** You will also need to customize product pages or code to incorporate your new language string IDs.

To add language strings

1. Log on to the Web Admin Tool.
2. Click **Add** on the Language Tools tabbed page.
3. Select a product in the **Product** box.

   > **Note:** If a product is not licensed, no additional options are available.

4. Type a unique ID for the string in the **ID** box.
5. Type the text for the new string in the **Value** box.
6. Click **Add String**. The string is added to all licensed languages for the selected product. You can customize the string for each language using options on the Edit tabbed page.

   > **Note:** On the Edit tabbed page, if you click by the added string, the string is deleted from all languages. This ensures that the languages have an equal set of strings.

7. Click **Log Off** to end the current session.

- [Comparing and Editing Language Strings](#)

Importing Language Strings

You can import custom strings into the database from an XML file for use in a licensed language in Polaris PowerPAC and Polaris ExpressCheck. The file must be set up in the same format as the default PowerPAC and ExpressCheck XML language files. Each supported language is identified by a **langid** code as follows:

- English - 1033
- Korean - 1042
- Polish - 1045
- Russian - 1049
- Farsi - 1065
- Vietnamese - 1066
- Hindi - 1081
- Hawaiian - 1141
- Chinese - 2052
- Spanish - 3082
- French - 3084
- Arabic - 12289
- Haitian Creole - 15372

Example (Language 1066=Vietnamese):

```xml
<?xml version="1.0" encoding="utf-8" ?>
    <polarisstrings>
        <strings langid="1066">
            <string strid="PACML_SEARCHOPTIONS_XSL_
            1689"><![CDATA[custom string text
            ]]></string>
            <string strid="PACML_SEARCHOPTIONS_XSL_
            1690"><![CDATA[custom string text
            ]]></string>
        </strings>
```

```
</polarisstrings>
```

Note: Unlike **Add**, this method adds custom strings only to the language specified in the imported XML file, not to every language file.

To import language strings

1. Log on to the Web Admin Tool.
2. Click **Import** on the Language Tools tabbed page.
3. Select a product in the **Product** box.
4. Select the organization for which you are importing the text.

   You can import language strings at the system, library, or branch level.

5. Type the path and filename for your file in the **File** box, or click **Browse** and browse to and select the file.
6. Click **Import XML**.

   The file is imported and your custom strings are added to the language specified in the file.

7. Click **Log Off** to end the current session.

Exporting Language Strings

To export language strings to an XML file

1. Log on to the Web Admin Tool.
2. Click **Export** on the Language Tools tabbed page.
3. Select a product in the **Product** box.
4. Select the language to export.
5. Select the organization whose language strings you wish to export.
6. Select an exporting option:
   - **Export current values** - Exports the current values for the specified product, language, and organization, including any customized strings.
   - **Export custom values** - Exports only the customized strings set for the organization.
   - **Export default Polaris values** - Export the default language strings that are stored in the default database table; does not include any customized strings.
7. Click **Export XML**. The File Download dialog box appears.
8. Click **Save** in the dialog box and specify a location for the exported file.

PAC Tools

The Polaris Web Admin Tool provides tools specifically for the PAC applications Polaris PowerPAC and Polaris MobilePAC. These include a language string identifier for PowerPAC and a Reload tool to clear the PowerPAC or MobilePAC cache and reload the appropriate application pages. (When you reload PowerPAC pages, Polaris PowerPAC Children's Edition pages are also reloaded.)

Identifying Polaris PowerPAC Language Strings by ID

This tool identifies PowerPAC language strings by their unique IDs. You can use this information to find and customize specific strings in context (see Comparing and Editing Language Strings).

To display the string IDs in PowerPAC

> **Important:** This utility starts a live PowerPAC session for the purpose of identifying language strings within the PowerPAC context. However, certain PowerPAC features may not function correctly within the Web Admin Tool. To test and use PowerPAC, reload PowerPAC after making your language string changes. See Reload a PAC Application. Then log off the Web Admin Tool and connect to PowerPAC.

1. Log on to the Web Admin Tool, and click the **PAC Tools** tab.
2. Click **Identify String**.
3. Click **Begin session**. PowerPAC opens in the Web Admin Tool window. Default language strings are marked with orange brackets. Language strings that have been customized are marked with green brackets.

> **Note:** Some strings may appear above the page. These contain the RSS information in the page header and are not visible to the PowerPAC user.

4. In the **Switch to another branch** box, select the organization whose strings you want to display.

5. Select the language from the list in the PowerPAC dashboard.

6. Hover the cursor over any of the highlighted brackets to show the string ID in a tool tip.

7. To customize a string, click a highlighted bracket to open the editor for that string. The Web Admin (Language Editor) Edit page opens with the organization and language already selected to match your PowerPAC choices. The selected string is listed in the edit table.

> **Note:** You can click **Open all strings in Language Editor** to open all the strings on the current PowerPAC page.

8. Edit the string as appropriate. See [Comparing and Editing Language Strings](#).

> **Note:** You may have to scroll the screen to the far right to see the edit icon.

9. Select **PowerPAC Tools** > **Identify Strings**, and click **End Session**.

> **Important:** The PowerPAC session is live. If you do not select **End Session**, the colored brackets will continue to be visible to PowerPAC users.

10. Clear the PowerPAC page cache and reload PowerPAC. See [Reload a PAC Application](#).

Reload a PAC Application

When you change PowerPAC, PowerPAC Children's Edition, or MobilePAC settings in Polaris Administration, or customize language strings with the Web Admin Tool, you must update page caches to see the effects of your changes. Most cached information is stored at the application level on the specified Web server. You update that information with the Reload feature in the Web Admin Tool. Follow these steps to clear the page cache and reload PowerPAC and PowerPAC Children's Edition or MobilePAC on a specified server. (When you reload PowerPAC pages, PowerPAC Children's Edition pages are also reloaded.)

> **Note:** Some information is stored at the session level (one session for each client browser currently connected to the PAC application), and you cannot reload each session's cached data for security reasons. In these cases, restart the Internet Information Server (IIS) to clear the cache and load any pages that have been changed. You may also need to close and re-open browsers.

To reload a PAC application

1. Log on to the Web Admin Tool, and click the **PAC Tools** tab.
2. Click the appropriate Server/Application link for each application instance you want to reload. The links are listed by the PAC root URLs as defined for each server in Polaris Administration.

   After a few moments, a confirmation message appears in the Status column.

3. Click **Log Off** to end the current session.

Compile Custom CSS

This option allows libraries without direct access to the PowerPAC server to compile custom CSS for custom themes. It is found under **PAC Tools** > **Compile CSS**:

When a site has at least one custom theme, a table similar to the PAC reload appears:

The table contains:

- PowerPAC Server - the names of the servers on which the custom themes are compiled.
- Custom Theme - the name of each custom theme found on the server. The name is clickable and executes the compile/recompile action on click.
- Status
  - Last date/time the theme compiled successfully
  - Theme not yet compiled
  - Compiling
  - Compile failed with any error details

- ◦ Compile successful

http://QA-Polaris.polarislibrary.com/polaris/	Compile 'MVLS' theme	Theme last compiled: 4/24/2019 1:22 PM
	Compile 'BCPL' theme	Theme not yet compiled
	Compile 'Responsive Test' theme	Compiling ...

http://rubenau-lt.iii.com/polaris	Compile 'MVLS' theme	Theme not yet compiled
	Compile 'BCPL' theme	**Compile failed** File: 'G:\Projects\Dev\Software\src\PowerPAC\custom\themes\bcpl\scss\style-bcpl.scss' not found on server
	Compile 'Rube' theme	**Compile successful**

When the site does not have custom themes, the following message appears:

To compile a custom theme, click the theme name in the table:

http://QA-Polaris.polarislibrary.com/polaris/	Compile 'MVLS' theme
	Compile 'BCPL' theme
	Compile 'Responsive Test' theme

When the compilation is complete, the results appear in the Status column.

Polaris Application Services Strings Reference

The following table lists Polaris Application Services strings. We renamed "Mnemonics" to "String Identifiers" so you can better match terms between documentation and the interface.

STRING IDENTIFIERS	DEFAULT MESSAGE
BULKERROR_ERRORRECORDSETOWNERIDISNULL	ErrorRecordSetOwnerID cannot be null.
BULKERROR_PROPERTYISINVALID	{0} is invalid.
BULKERROR_PROPERTYLENEXCEEDED	{0} length cannot exceed {1} characters.
PAS_ACKNOWLEDGEOTFCATALOGING	This item was created 'on the fly' and requires full cataloging.
PAS_ACQ_CHARGETYPE_INVALID	Invalid Header Charge Type.
PAS_ACQ_UPDATE_INFO_INVALID_MSG	Action blocked because of Update Info error.
PAS_ACQCHARGECATSERV	Cataloging services
PAS_ACQCHARGECREDIT	Credit
PAS_ACQCHARGEOTHER	Other
PAS_ACQCHARGESERV	Service
PAS_ACQCHARGESHIP	Shipping
PAS_ACQCHARGESPECHAND	Special handling
PAS_ACTIONNOTALLOWEDONDELETEDITEM	The record status of this item is Deleted. Action cannot be taken on a Deleted item.
PAS_ACTIONNOTALLOWEDONITEM	Action cannot be taken on this item.
PAS_ACTIONNOTALLOWEDONPROVISIONALITEM	The record status of this item is Provisional. Action cannot be taken on a Pro-

STRING IDENTIFIERS	DEFAULT MESSAGE
	visional item.
PAS_ACTIVATIONDATEERROR	Activation date has to be greater than or equal to the current date.
PAS_ADDCREDITDATANULLERROR	addCreditData cannot be null
PAS_ADDFROMFILEREPORTDUPEBARCODES	The following barcodes were already in the record set, and were not added again:
PAS_ADDFROMFILEREPORTDUPEBARCODESINEXT	The following barcodes were listed more than once in the external file, and were added only once to the record set:
PAS_ADDFROMFILEREPORTDUPEPATRONS	The following PatronIDs were already in the record set, and were not added again:
PAS_ADDFROMFILEREPORTDUPEPATRONSINEXT	The following PatronIDs were listed more than once in the external file, and were added only once to the record set:
PAS_ADDFROMFILEREPORTNOMATCHINGITEMS	No matching item record was found for the following barcodes:
PAS_ADDFROMFILEREPORTNOMATCHINGPATRONS	No matching patron record was found for the following PatronIDs:
PAS_ADDITIONALTEXTPHONEMISSING	Additional TXT notice is checked. Please select a phone number to receive text messages.

STRING IDENTIFIERS	DEFAULT MESSAGE
PAS_ADDRESS_STREETONE_LENGTHINVALID	Street one length is invalid.
PAS_ADDRESS_STREETTHREE_LENGTHINVALID	Street three length is invalid.
PAS_ADDRESS_STREETTWO_LENGTHINVALID	Street two length is invalid.
PAS_ADDRESS_ZIPPLUSFOUR_LENGTHINVALID	Zip plus four length is invalid.
PAS_ADDRESSESINSERTFAILED	failed to insert entry in addresses table
PAS_ADDRESSLABELHOME	Home
PAS_ADDRESSMISSINGTITLE	No address entered
PAS_ADHOCBULKCHANGEREQUIRESLISTOFRECORDIDS	Ad-hoc bulk change requires list of record IDs.
PAS_ADHOCCHANGEREPORT_NAME	Ad Hoc bulk change; no record set selected
PAS_ADMINATTRIBUTEDOESNOTEXIST	Admin attribute for mnemonic '{0}' does not exist.
PAS_ALLDONORFIELDSREQUIRED	All donor fields must be supplied when DonorID is not supplied.
PAS_ALTEMAILFIELDNAME	Alt Email
PAS_AMOUNTLARGERTHANOUTSTANDING	Changed amount should not be larger than the outstanding.
PAS_AMOUNTLESSTHAN	Please enter an amount less than {0}
PAS_AMOUNTRANGE	Please enter an amount between 0.01 and 2,000,000.00.
PAS_AMOUNTZEROERROR	Amount must be greater than zero.
PAS_ARG_INVALID	{0} ({1}) is invalid
PAS_ASSIGNEDBRANCHIDREQUIRED	AssignedBranchID is

STRING IDENTIFIERS	DEFAULT MESSAGE
	required.
PAS_ASSIGNEDBRANCHNOEXIST	Assigned branch does not exist.
PAS_ASSIGNEDBRANCHNOTBRANCHTYPEERROR	Assigned branch cannot be at the system or library level.
PAS_ASSIGNEDCOLLECTIONIDREQUIRED	AssignedCollectionID field must also be supplied when AssignedBranchID is provided.
PAS_ASSIGNEDCOLLECTIONNOEXIST	Assigned collection does not exist.
PAS_ASSIGNEDCOLLECTIONNOTALLOWED	Assigned collection not allowed for assigned branch.
PAS_ASSIGNEDHOMEBRANCHDIFFERENT	The Assigned Branch and Home Branch fields are different. If you want to make Assigned and Home branch the same, click Cancel to stop and re-set the values.
PAS_ASSOCAUTHRECORDSETSIZEWARNING	The resulting authority record set named '{0}' will contain up to {1} records. {2}
PAS_ASSOCBIBRECORDSETSIZEWARNING	The resulting bibliographic record set named '{0}' will contain up to {1} records. {2}
PAS_ASSOCIATEDBIBIDNOEXIST	Associated bib record {0} does not exist in database.
PAS_ASSOCIATEDBIBNOEXIST	Associated bib record does not exist.
PAS_ASSOCIATEDBIBRECORDIDREQUIRED	AssociatedBibRecordID is

STRING IDENTIFIERS	DEFAULT MESSAGE
	required.
PAS_ASSOCIATEDPATRONBLOCKDESC	Associated patron [{0}, {1}] is blocked: {2}.
PAS_ASSOCIATEDPATRONLISTINVALID	Associated patron list is invalid
PAS_ASSOCIATEDPATRONRECORDALREADYEXISTS	Associated patron record already exists with id {0}
PAS_ASSOCIATEDPATRONRECORDDOESNOTEXIST	Associated patron record does not exist with id {0}
PAS_ASSOCITEMRECORDSETSIZEWARNING	The resulting item record set named '{0}' will contain up to {1} records. {2}
PAS_ASSOCRECORDSETNAMEEXCEEDSLENGTH	Associated record set name cannot exceed 65 characters
PAS_ATTRIBUTEISNULL	{0} is null
PAS_AUTHCONTROLLER_AUTHDATAREQUIRED	Authentication data is required.
PAS_AUTHCONTROLLER_NOAUTHUSINGBEARERTOKEN	User has not been authen-ticated using bearer access token.
PAS_AUTHCONTROLLER_USERNOTAUTHENTICATED	User was not authen-ticated.
PAS_AUTHOR	Author
PAS_AUTHORITYIDINVALID	Authority ID is invalid
PAS_AUTHORITYLOCKED	Authority record {0} is locked by another user.
PAS_AUTHORITYLOCKEDBY	Authority record is locked by {0}.
PAS_AUTHORITYRECORDDELETEFAILED	Authority record {0} could not be deleted.
PAS_AUTHORITYRECORDDELETEFAILEDUNKNOWN	Authority record {0} could

STRING IDENTIFIERS	DEFAULT MESSAGE
	not be deleted. {1}
PAS_AUTHORITYRECORDDESC	authority record
PAS_AUTHORITYRECORDHEADINGDELETIONOPTIONS	Authority Record Heading Deletion Options
PAS_AUTHORITYRECORDLINKSBREAKABLE	Authority Record Links (Breakable)
PAS_AUTHORITYRECORDLINKSBREAKABLEMESSAGE	The following links will be broken if you continue deleting authority record [{0}]:
PAS_AUTHORITYRECORDLINKSUNBREAKABLE	Authority Record Links (Unbreakable)
PAS_AUTHORITYRECORDLINKSUNBREAKABLEMESSAGE	Deletion of authority record [{0}] is not possible due to the following unbreakable link(s):
PAS_AUTHORITYRECORDUNDELETEFAILED	Authority record {0} was not undeleted.
PAS_AUTHORITYRECORDUNDELETEFAILEDUNKNOWN	Authority record {0} was not undeleted. {1}
PAS_AUTHORITYRECSETSBARCODESNOTSUPPORTED	Authority Record Sets do not support barcode lists.
PAS_AUTHORLENGTHERROR	Author cannot exceed 255 characters
PAS_BARCODE	barcode
PAS_BARCODEASSIGNEDTOQUICKCIRC	Item barcode {0} is assigned to a quick-circ item.
PAS_BARCODECHANGEDCONTINUE	The barcode was changed. Do you want to continue saving?
PAS_BARCODECHANGENOTALLOWEDFORELECTRONICITEM	Changing the barcode is not allowed for electronic items.

STRING IDENTIFIERS	DEFAULT MESSAGE
PAS_BARCODECHANGENOTALLOWEDFOROUTITEM	Changing the barcode is not allowed for checked out items.
PAS_BARCODEDEFINEDFORPATRONSCONTINUE	This barcode format is defined for patron records. Do you want to use this bar-code for this item?
PAS_BARCODEFOMRATINVALID	Invalid barcode type: {0}
PAS_BARCODEFORMATINVALID	Invalid barcode type:{0}
PAS_BARCODEFORMATUNEXPECTED	Unexpected barcode type: {0}
PAS_BARCODEINVALIDMAXLENGTH	A valid item barcode must be supplied. Maximum length is {0}
PAS_BARCODELABEL	Barcode:
PAS_BARCODENOTFOUND	Barcode: {0}
PAS_BARCODEUSEDFORPATRON	A patron record exists for this barcode.
PAS_BIBBULK_DATAFIELDS_INVALID_ALTINDICATOR	Data Fields: Alt Indicator cannot be the same as the current Indicator
PAS_BIBBULK_DATAFIELDS_INVALID_ALTINDICATOR_ COMBINATION	Data Fields: If an indicator is being changed, it's value cannot be '*'
PAS_BIBBULK_DATAFIELDS_INVALID_ALTINDICATOR_ REQUIRED	Data Fields: At least one indicator must be changed
PAS_BIBBULK_DATAFIELDS_INVALID_ ALTINDICATORONE	Data Fields: Invalid Altern-ate Indicator One
PAS_BIBBULK_DATAFIELDS_INVALID_ ALTINDICATORTWO	Data Fields: Invalid Altern-ate Indicator Two
PAS_BIBBULK_DATAFIELDS_INVALID_ALTTAGNUMBER	Data Fields: Alternate Tag Number cannot be less than 10 or greater than 999

STRING IDENTIFIERS	DEFAULT MESSAGE
PAS_BIBBULK_DATAFIELDS_INVALID_ CORRECTINDICATORS	Data Fields: Only one Correct non-filing indicator values (initial articles 'a', 'an' or 'the') operation can be submitted
PAS_BIBBULK_DATAFIELDS_INVALID_DESCRIPTION	Data Fields: Invalid Description
PAS_BIBBULK_DATAFIELDS_INVALID_INDICATORONE	Data Fields: Invalid Indicator One
PAS_BIBBULK_DATAFIELDS_INVALID_INDICATORTWO	Data Fields: Invalid Indicator Two
PAS_BIBBULK_DATAFIELDS_INVALID_OPERATIONID	Data Fields: Invalid OperationID
PAS_BIBBULK_DATAFIELDS_INVALID_ OPERATIONID13TAGNUMBER	Data Fields: Invalid Tag Number for Operation ID 13
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELD_ CHANGES	Data Fields: The number of Subfield Changes for each Data Field Change cannot be greater than 10 or less than 1
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDCHANGE	Data Fields: A Subfield Change is required for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_ SUBFIELDCHANGE_NOTALLOWED	Data Fields: Subfield changes are not allowed for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDDATA	Data Fields: Subfield Data length cannot be greater than 4000
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDDELETE_ COUNT	Data Fields: Only 1 Subfield Change can be specified for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDDELETE_ SUBFIELDCODE	Data Fields: Subfield Code is required for Operation ID

STRING IDENTIFIERS	DEFAULT MESSAGE
	{0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDDELETE_SUBFIELDDATA	Data Fields: Subfield Data is required for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDDELETE_SUBFIELDDATAEMPTY	Data Fields: Subfield Data should be empty for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDEXECUTIONORDER	Data Fields: Subfield Execution Order {0} does not match any of the Data Field Changes Execution Orders
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDINSERTBEFOREAFTER	Data Fields: The specified Subfield Code insert before/after value must be the last subfield and have an empty Subfield Data value
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDREPLACE_COUNT	Data Fields: 2 Subfield Changes must be specified for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_SUBFIELDREPLACE_SUBFIELDORDER	Data Fields: Subfield Order can only be 1 and 2 for Operation ID {0}
PAS_BIBBULK_DATAFIELDS_INVALID_TAGNUMBER	Data Fields: Tag Number cannot be less than 10 or greater than 999
PAS_BIBBULK_DATAFIELDS_INVALID_TAGNUMBER_OPERATION_CHANGE	Data Fields: Tag Number changes are not allowed for Tag {0} New custom string
PAS_BIBBULK_DATAFIELDS_INVALID_TAGNUMBER_OPERATION_DELETE	Data Fields: Delete operations are not allowed for Tag {0}
PAS_BIBBULK_DATAFIELDS_INVALID_TAGNUMBER_SUBFIELDCODE	Data Fields: Changes are not allowed for Tag {0} and

STRING IDENTIFIERS	DEFAULT MESSAGE
	Subfield Code ${1}

Polaris Notice Strings Reference

The following table lists English language strings for Polaris print, email, and text message (text to mobile phone) notices and related messages, as well as Borrow by Mail package materials. We renamed "Mnemonics" to "String Identifiers" so you can better match terms between documentation and the interface.

If you edit text message notices, keep the following rules in mind:

- **Character limit** - Individual messages are limited to 160 characters. If you enter more characters, the text will be carried into a second message, provided the patron's carrier supports this feature.
- **URLs** - You can include a URL in the message, but note that the URL takes up message space and the link may not be active, depending on the patron's carrier.
- **Languages** - Text messaging does not support Unicode, so text message notices in languages with diacritics are not rendered accurately.

STRING IDENTIFIERS	DEFAULT MESSAGE	CONTEXT
BBM_MAILER	A $[AMOUNT] per item delivery charge has been added to your record. The due date has been extended to include delivery time. To return item you may reuse our mailer and the label provided below. You pay return postage. Or, to save postage, return item with mailer to any library. Please return material before the due date to avoid overdue fines. You may renew online or by phoning your library. To review your account, go to your library website and click on MyLibraryAccount. You may mail checks to the address below or pay delivery charge at any library. Please be sure to include your library card number on your check.	Borrow by Mail - package insert body text. For English, do not edit [AMOUNT]; the system supplies the charge. For a foreign language translation, you must specify the charge as text.

Polaris Fusion Strings Reference

The following table lists Polaris Fusion English language strings and where they appear in the Fusion product. You can use this information to find and customize specific language strings. We renamed "Mnemonics" to "String Identifiers" so you can better match terms between documentation and the interface.

Note: For more information about Polaris Fusion, see Polaris Fusion online Help.
