What's New	1
Fixed Issues	2

What's New

The following table details the new features and functionality included in this release.

ID	NetSuite	New Feature Release Note
CHM-6900		Chamo now runs on the OpenJDK 8 platform. (Previous versions of Chamo ran on Oracle Java 8.)

Fixed Issues

The following table details the fixed issues for this release.

ID	NetSuite	Fixed Issue Description
CHM-6883	887591	When you viewed a title on the Search Results screen, the list of available copies was not sorted correctly. The same problem occurred on the Copies tab of the Item Details screen. This is fixed. On both screens, available copies at the main location for the current theme are now correctly listed first, followed by available copies at other locations.
CHM-6727	814189	An error sometimes occurred when you attempted to view a bibliographic record in the Virtua client. The problem only occurred when LDAP authentication was enabled for your Virtua user account.
