Important Note

Support for Virtua 16.4 on the Oracle Solaris SPARC platform is not available at this time (October 2021). Please contact Innovative Support for updates on support for this platform.

What's New

Virtua Server

The following table details the new features and functionality included in this release.

ID	NetSuite	New Feature Release Note
VIRTUA-24468		As of version 16.4, Virtua now supports and requires Oracle Database 19c. For help upgrading your database to Oracle Database 19c, contact Innovative Support.

Fixed Issues

Virtua Client

Library of Congress

The following table details the fixed issues for this release.

ID	NetSuite	Fixed Issue Description
VIRTUA-24525	894937	LoC only: A problem sometimes occurred when you added an item to a shipping box and then selected Save on the Add/Update Box window. If you opened the shipping box again, the title of the item was sometimes missing from the View Box window. This problem occurred when the item in question was created automatically after a copy was received on the Binding List window.
VIRTUA-24519	895347	LoC only: The LOC_SUB_PROFILE_LINK_V Ad Hoc view now includes a Status field. This makes it possible to filter sub-profiles based on a participant's status. Note that to apply this fix, you must install 16.4 and then run the Cr_LOC_Ad_hoc.sh script.

Virtua Server

The following table details the fixed issues for this release.

ID	NetSuite	Fixed Issue Description
VIRTUA-24497	863997	Instead of displaying appropriate data for the Command field, the OPERATION_LOG_V and LOC_OPERATION_LOG_V Ad Hoc views sometimes displayed a value of "Unknown" for that data field. The problem occurred when the Ad Hoc view displayed data for certain bulk serials check-in operations.

InfoStation

The following table details the fixed issues for this release.

ID	NetSuite	Fixed Issue Description
VIRTUA-24537	909789	Scheduled InfoStation reports failed to run in Virtua versions 16.3 and 16.3.SP1.
VIRTUA-24049		In InfoStation version 16.2 SP2 and later, InfoStation failed to open the Help window when you selected the Help icon. The problem occurred when you used a browser other than Internet Explorer 11 or Safari for Windows. This is fixed. You can now access InfoStation help from other browsers, including Chrome, Firefox, Opera, and Edge.
